Office Action Summary	Application No. 10/661,015	Applicant(s) GATTS, TODD D.	
	Examiner Brian T. Pendleton	Art Unit 2615	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Information Disclosure Statement

The information disclosure statement filed 4/8/04 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered. There are no copies of the non-patent literature.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5, 13-16, and 19-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Davis, US Patent 5,454,041 in view of Hejna, Jr., US Patent Application Publication 2006/0271979. Davis teaches an audio mixer for processing audio information for broadcast to an audience comprising studio microphone 30 and remote microphone 32 for capturing first and second audio information and combining the audio information for broadcast through broadcast means 46. Davis does not disclose changing the first audio information from occurring in a first time interval to occurring in a second time interval to provide time-changed audio information. Hejna, Jr. discloses a method and apparatus for controlling the time-scale of audio during broadcasts. Thus, Hejna, Jr. teaches changing audio from occurring in a first time interval to occurring in a second time interval using time scale modification subsystem 800. It would have

been obvious to one of ordinary skill in the art at the time of invention to modify Davis to have time scale modification, as taught by Hejna, Jr., of the audio signals from the microphones for the purpose of aligning the audio signals for broadcast, as proposed by Hejna, Jr. (paragraph 88). Claims 1, 13, and 19 are rejected. Regarding claims 2-5, 14-16, and 20-23, the combination meets all the limitations, including time scale modifying either the first or second audio information to align the audio signals for broadcast and supplying the audio information of communications links.

Allowable Subject Matter

Claims 6-12, 17, 18, 24-30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
